EDUCATION

COMSATS University Islamabad, Lahore Campus

Lahore, Pakistan

Bachelor of Science in Computer Science; CGPA: 3.5/4.00

Expected 2028

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Machine Learning

Punjab College

Lahore, Pakistan

Intermediate in Pre-Engineering; Grade: A

EXPERIENCE

Software Development Intern

2024 – Present

Self-Driven Projects

Remote

- Designed and developed 4+ production-level Android applications serving 500+ active users
- Developed custom backend services using Node.js and WebSockets, reducing Firebase infrastructure costs by 40%
- Optimized local data persistence and caching with Room Database, reducing application launch time by 30%
- Implemented CI/CD workflows with GitHub Actions for automated testing and application deployment

PROJECTS

Anom – Real-Time Chat Application | *Android, Java, Node.js, WebSockets, Firebase*

- Built a real-time Android chat application with a custom backend and WebSocket-based communication
- Implemented secure messaging and file-transfer functionality with a focus on privacy and reliable communication
- Designed the application architecture to support real-time messaging without relying entirely on Firebase Realtime Database

Timetable Optimizer | *Python, React*

- Developed a timetable optimization application using Python for scheduling and React for the user interface
- Designed scheduling logic to generate and optimize academic timetables based on defined constraints
- Automated timetable processing to reduce manual work involved in academic scheduling

Maze Solver | *Python, Machine Learning*

- Developed a path-finding and classification model designed to identify efficient paths through maze environments
- Applied algorithmic problem-solving techniques to evaluate and determine possible routes

License Plate Recognition | *Python, OpenCV, Keras, TensorFlow*

- Developed a computer vision system to detect and recognize vehicle license plates from images
- Applied image-processing and machine-learning techniques for license plate detection and recognition

Image to ASCII | *Python, OpenCV*

- Developed an image-processing application that converts images into ASCII-art representations
- Applied image processing techniques to transform visual information into character-based output

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, HTML, CSS, Bash, SQL

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Libraries: NumPy, Pandas, OpenCV, scikit-learn, Matplotlib

Frameworks: Flask, Django, Node.js, React, Bootstrap, Keras, TensorFlow, PyTorch

Tools & Technologies: Git, Docker, AWS, GCP, Heroku, JIRA, REST APIs, WebSockets
